Getting the flooring right in a room scheme is intrinsic to the success of the overall look. No matter how beautiful the furnishings or colour scheme may be, nondescript tiles, bland laminates or tired carpeting will cancel out their style credentials. The good news is that transforming a dull floor need not be prohibitively expensive or disruptive, provided you choose well and opt for a reputable supplier. And even if you aren't able to make massive changes in your current home, investing in a rug that will not only enliven a room, but which you'll enjoy for years to come, is a great option. Here's a round-up of some of the best flooring choices for homes in the UAE.

## WOOD FLOORING

Wooden floors are beautiful, practical and enduring. There's a limitless choice – from simple planks to intricate parquet designs, and colourways ranging from rich dark shades to pale, bleached finishes that suit any style or budget. However, it's also important to consider other factors such as light exposure, room shape and space, and the flow of traffic – a busy family area will require a more practical choice than, say, a quiet study or guest room. ▶

ALWAYS ENSURE THAT THE COMPANY YOU CHOOSE TO SUPPLY YOUR WOODEN FLOOR SOURCES MATERIALS FROM SUSTAINABLE FORESTS AND IS CERTIFIED AS SUCH
